I adore this sound track. A wide variety of music that works well as a soundtrack. Transition from one track to the next flows well for me. I thought it worked quite well with setting the tone for scenes in the Otome and there were a few on the list that made me go "wait. where was that one in the story?" so they felt fresh to me. Also makes great background music for messing around the house, reading and playing other games whose soundtracks suck. Creepy things on loop combined with Visceral clean up detail is just too fun. Kudos Christopher and Michaela, went back to it and still really enjoy the game. [Races the psycho squirrel and yanks it off my wallet before it can reach the credit cards.] Ha, too slow!
